Market Commentary – October 2015

Market Environment

Global equities roared back in October, mostly erasing September's losses amid declining volatility and continued monetary accommodation from the major central banks. The S&P 500 gained 8.4% on the month as global easing provided a supportive backdrop for equities, even as expectations of a rate hike in 2015 stand roughly at 50/50 following the Fed's comments at the end of October. International equities returned 7.8% as monetary easing measures in Europe remain firmly in place and better than expected corporate earnings in Japan offset the Bank of Japan's decision to refrain from expanding its current easing program. Emerging market equities gained 7.1%, as 'risk on' sentiment combined with moderating concerns around growth in China. Treasury yields rose modestly leading to mostly flat returns in US high-quality fixed-income markets; high-yield issues rallied 2.8%. Global developed bond markets were similarly even. Emerging market debt rallied in conjunction with high yield, gaining 4.5%, according to the JP Morgan GBI-EM Global Diversified Index, with modest currency appreciation adding to returns.

October's returns were a reminder that despite low forward-looking global growth and expectations of higher volatility, significant monetary accommodation remains entrenched around the world, largely supporting broad risk-taking and higher-priced financial assets. Though global equity valuations appear to be near or above fair value, low yields and inflation expectations are keeping equities in favor during 'risk on' episodes

Market Outlook

At NEPC, we believe non-US developed equities are more attractive than their US counterparts as Eurozone credit growth has shown improvement and quantitative easing measures appear more open-ended. In emerging market equities, we continue to balance positive long-term growth prospects with negative near-term sentiment and currency weakness; we recommend investors stay committed to the space and maintain targets at or above market weight. While we have consistently recommended multi-asset approaches to diversification—be it through global asset allocation or risk parity strategies—we believe diverging regional economic conditions create a particularly attractive environment for skilled multi-asset managers with the flexibility to express global macro views. Though the past month may hint that equities, particularly in the US, may have further room to run, we believe a disciplined and diversified approach will benefit investors over the long term and in periods of increased volatility.

Beginning Market Value may not match the Ending Market Value of the previous Flash report due to delayed reporting of private investments (private equity and real estate).

Information Disclaimer and Reporting Methodology

Information Disclaimer

- Past performance is no guarantee of future results.
- All investments carry some level of risk. Diversification and other asset allocation techniques are not guaranteed to
 ensure profit or protect against losses.
- NEPC's source for portfolio pricing, calculation of accruals, and transaction information is the plan's custodian bank.
 Information on market indices and security characteristics is received from other sources external to NEPC. While NEPC has exercised reasonable professional care in preparing this report, we cannot guarantee the accuracy of all source information contained within.
- Some index returns displayed in this report or used in calculation of a policy, allocation or custom benchmark may be preliminary and subject to change.
- This report is provided as a management aid for the client's internal use only. Information contained in this report does
 not constitute a recommendation by NEPC.
- This report may contain confidential or proprietary information and may not be copied or redistributed to any party not legally entitled to receive it.

Reporting Methodology

- The client's custodian bank is NEPC's preferred data source unless otherwise directed. NEPC generally reconciles custodian data to manager data. If the custodian cannot provide accurate data, manager data may be used.
- Trailing time period returns are determined by geometrically linking the holding period returns, from the first full month after inception to the report date. Rates of return are annualized when the time period is longer than a year. Performance is presented gross and/or net of manager fees as indicated on each page.
- For managers funded in the middle of a month, the "since inception" return will start with the first full month, although actual inception dates and cash flows are taken into account in all Composite calculations.
- This report may contain forward-looking statements that are based on NEPC's estimates, opinions and beliefs, but NEPC
 cannot guarantee that any plan will achieve its targeted return or meet other goals.
