# MARKET COMMENTARY – DECEMBER 2017

## Market Environment

Equities rounded out a banner year with additional gains on the back of strong earnings and economic growth. Maintaining their lead, emerging market stocks returned 3.6% in December, according to the MSCI EM index, racking up gains of 37.9% in 2017. The S&P 500 was up 1.1% on the month and—setting a new record—was in the black every month of the calendar year.

The Fed raised rates in December, for the third time in 2017, despite inflation remaining below the central bank's target levels. In response, the yield curve continued to flatten with the 10-year unchanged at 2.41% and the 30-year down nine basis points to 2.74%. While the 10-year ended only four basis points lower than at the end of 2016, the 10-2 spread declined to its lowest level in nearly a decade. As has been the story for most of the year, longer-duration fixed income fared well with the Barclays Long Credit Index and Barclays Long Treasury Index up 2.0% and 1.7%, respectively, in December.

As we turn the page to 2018, our views at NEPC remain mostly unchanged. Despite significant run-ups in international equities, we still find non-US stocks attractive relative to domestic equities, given the potential for continued growth in international developed and emerging economies. Within fixed income, we suggest investors shift away from credit risk as spreads have fallen well below median levels in both US investment-grade and high-yield spaces and, as such, future return expectations have declined. We also remind investors of the importance of rebalancing back to target, particularly in light of the recent sustained outperformance of equities.

## Information Disclaimer and Reporting Methodology

### Information Disclaimer

- Past performance is no guarantee of future results.
- All investments carry some level of risk. Diversification and other asset allocation techniques are not guaranteed to ensure profit or protect against losses.
- NEPC's source for portfolio pricing, calculation of accruals, and transaction information is the plan's custodian bank. Information on market indices and security characteristics is received from other sources external to NEPC. While NEPC has exercised reasonable professional care in preparing this report, we cannot guarantee the accuracy of all source information contained within.
- Some index returns displayed in this report or used in calculation of a policy, allocation or custom benchmark may be preliminary and subject to change.
- This report is provided as a management aid for the client's internal use only. Information contained in this report does not constitute a recommendation by NEPC.
- This report may contain confidential or proprietary information and may not be copied or redistributed to any party not legally entitled to receive it.

### Reporting Methodology

- The client's custodian bank is NEPC's preferred data source unless otherwise directed. NEPC generally reconciles custodian data to manager data. If the custodian cannot provide accurate data, manager data may be used.
- Trailing time period returns are determined by geometrically linking the holding period returns, from the first full month after inception to the report date. Rates of return are annualized when the time period is longer than a year. Performance is presented gross and/or net of manager fees as indicated on each page.
- For managers funded in the middle of a month, the "since inception" return will start with the first full month, although actual inception dates and cash flows are taken into account in all Composite calculations.
- This report may contain forward-looking statements that are based on NEPC's estimates, opinions and beliefs, but NEPC cannot guarantee that any plan will achieve its targeted return or meet other goals.
