MARKET COMMENTARY – MAY 2018

Market Environment

Volatility remained a mainstay in May amid festering trade tensions between the US and China and Italy's struggle to form a new government. The US dollar strengthened 2% relative to a basket of major currencies, fueling declines of 2.2% and 3.5% in the MSCI EAFE and MSCI Emerging Markets indexes, respectively. In contrast, the S&P 500 Index gained 2.4% last month.

Within fixed income, safe-haven asset classes edged up modestly. The yield curve shifted downward slightly with the 10-year declining nine basis points to 2.86%, despite hitting 3.1% during the month, and the 30-year falling 10 basis points to 3.03%. As a result, the Barclays Long US Treasury and Barclays Long Credit indexes increased 2.1% and 0.5%, respectively. Outside the US, European government bond yields broadly declined with the 10-year German Bund yield falling 22 basis points to 0.34%. The spread between 10-year German and Italian sovereign debt touched 2.53%—the highest since 2013—amid political turmoil in Italy. In emerging markets, weakening local currencies fueled declines of 5% in the JPM GBI-EM Index.

Liquid real assets maintained their winning streak as oil prices, bolstered by OPEC production cuts, geopolitical instability in some oil-producing regions and strong global demand, touched \$80 per barrel — a first since 2014. Additionally, the Alerian MLP Index continued to rebound – increasing 5.0% for the month.

At NEPC, we expect underlying market conditions to remain supportive for international and emerging market equities. With the potential for continued volatility, we encourage the addition of safe-haven fixed-income exposure to mitigate the impact of potential market drawdowns. We remind clients to stay committed to a risk-balanced approach and to evaluate market opportunities should larger short-term dislocations occur.

Cash flow statistics exclude management fees and expenses.

Information Disclaimer

- Past performance is no guarantee of future results.
- All investments carry some level of risk. Diversification and other asset allocation techniques are not guaranteed to ensure profit or protect against losses.
- NEPC's source for portfolio pricing, calculation of accruals, and transaction information is the plan's custodian bank. Information on market indices and security characteristics is received from other sources external to NEPC. While NEPC has exercised reasonable professional care in preparing this report, we cannot guarantee the accuracy of all source information contained within.
- Some index returns displayed in this report or used in calculation of a policy, allocation or custom benchmark may be preliminary and subject to change.
- This report is provided as a management aid for the client's internal use only. Information contained in this report does not constitute a recommendation by NEPC.
- This report may contain confidential or proprietary information and may not be copied or redistributed to any party not legally entitled to receive it.

Reporting Methodology

- The client's custodian bank is NEPC's preferred data source unless otherwise directed. NEPC generally reconciles custodian data to manager data. If the custodian cannot provide accurate data, manager data may be used.
- Trailing time period returns are determined by geometrically linking the holding period returns, from the first full month after inception to the report date. Rates of return are annualized when the time period is longer than a year. Performance is presented gross and/or net of manager fees as indicated on each page.
- For managers funded in the middle of a month, the "since inception" return will start with the first full month, although actual inception dates and cash flows are taken into account in all Composite calculations.
- This report may contain forward-looking statements that are based on NEPC's estimates, opinions and beliefs, but NEPC cannot guarantee that any plan will achieve its targeted return or meet other goals.
